23, 73, 35

Question 1

a. 58 = pivot

47, 74, 8, 58, 3, 21, 73, 89, 23, 35

35, 47, 8, 58, 3, 21, 73, 89, 23, 74

b. DelFirst()

```
node * current = inHead;
```

```
delete (current)
```

```
return inHead  
}
```

DelNext()

```
node * current = inHead;
```

```
while (current != Null) {
```

```
if (current->next == p) {
```

```
delete (current->next)  
}
```

```
else {
```

```
current = current->next)
```

```
}
```

o DelPrevious() {

node \* current = inHead

while (current != Null) {  
    if (current = p) {

o Find Last() {

node \* current = inHead

while (current != Null) {  
    if (current->next != Null) {  
        delete (current)  
    }  
    else {  
        current = current->next  
    }  
}  
}

c i. digit = 35      output = 33

ii. int FunS(int n) {

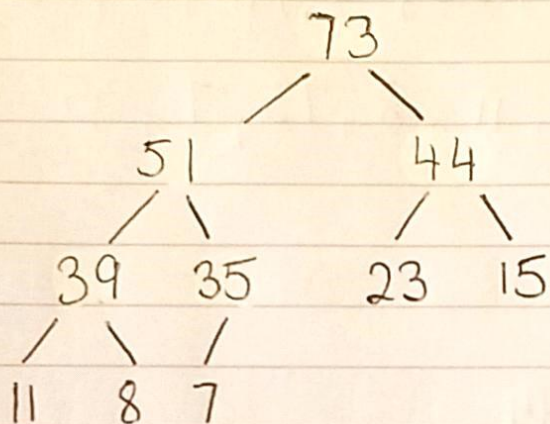

if (n > 0) {  
    n = (n - 2)  
    return n  
}  
}

## Question 2

a

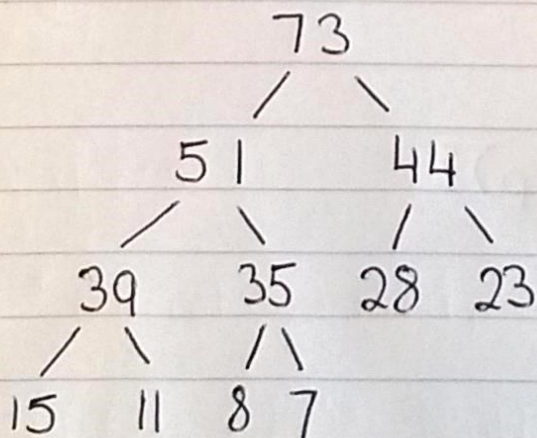

max-heap

min-heap

b

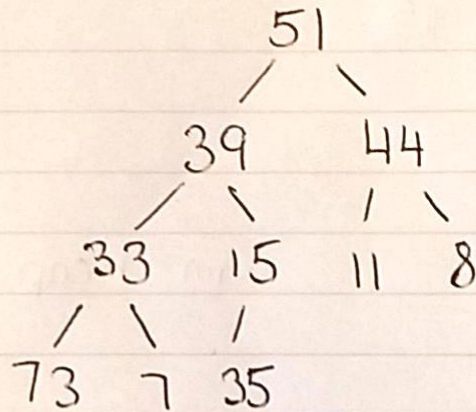

d. 73, 51, 44, 39, 35, 33, 15, 11, 8, 7

pass 1: 7, 51, 44, 39, 35, 33, 15, 11, 8, 73

pass 2: 51, 39, 44, 33, 15, 11, 8, 73, 7, 35

c. Parent(p) {

left

right

if (left = p || right = p) {
